

Ricardo López Novelo

Product Designer · iOS, Android & Web

Monterrey, Mexico · (818) 084-2608 · ricardonovelo97@gmail.com · [LinkedIn](#) · [Behance](#) · [Portfolio](#) · [GitHub](#)

Product designer with a Computer Science degree, designing digital products since 2021 across iOS, Android, and web. At Whirlpool I own the UX for connected appliances, working with product managers and engineers from discovery and user flows to high fidelity UI and the design standards behind them. I also code (Swift, basic web), which keeps me close to implementation, and I use AI tools like Claude Code daily to work faster.

EXPERIENCE

Whirlpool Corporation - User Experience Designer November 2024 - Present

- Own the UX for connected appliances across Whirlpool's mobile apps, designing multi step device flows, including their states and edge cases, with product managers and engineers.
- Built **Demos** ([GitHub](#)), an internal iOS tool the design team uses to prototype and test new designs and features on real devices before they launch in Whirlpool's official apps.
- Established the team's design standards, workflows, and best practices.

Digital Turbine - Product Designer September 2021 - August 2023

- Collaborated on the redesign of MetroZone, T-Mobile's Android content app. User satisfaction rose 30% after it shipped.
- Maintained and updated a design system of several hundred UI components.

RNDVU - Freelance Product Designer December 2022 - March 2023

- Validated adoption of new features in a social event planning app.

Tech365 - Visual Design Intern June 2020 - May 2021

- Improved the company's ecommerce website, designing responsive pages in Figma and implementing them in OpenCart.

La Tuna Group - Visual Design Intern June 2017 - July 2018

- Created social media and brand graphics for public figures in the music industry.

DESIGN & CODE PROJECTS

June - iOS photo journal · [Demo video](#) June 2025 - Present

- A journaling app that borrows the effortless gestures of large scale social apps and redirects them toward reflection, gratitude, and well being. Designed and built solo in Swift/UIKit, down to the image caching and prefetching that keep it fast on large photo libraries.

EDUCATION

Universidad Autónoma de Nuevo León - BS in Computer Science December 2022

Universidad Autónoma de Nuevo León - BA in Audiovisual Language & Production December 2020

SKILLS

Design: user flows & wireframes, prototyping, design systems, interaction design, usability testing, accessibility

Code: Swift (UIKit, SwiftUI), HTML & CSS, Git

Tools: Figma, FigJam, Xcode, Claude Code and other AI tools in daily design and development work

Languages: English (fluent), Spanish (native)
